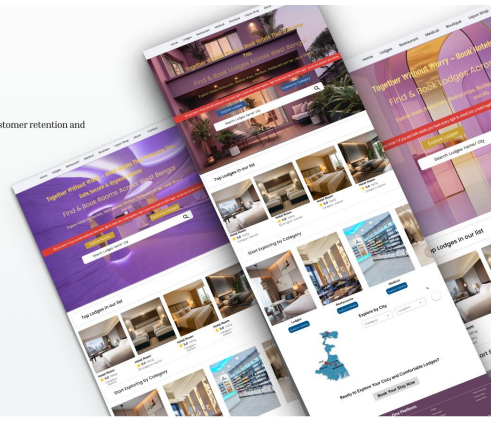
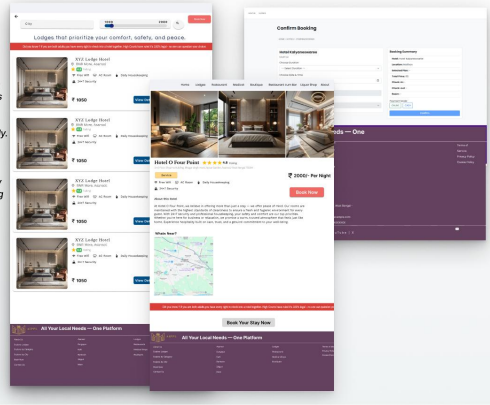
Lodge Booking System

A lodge booking system that improved customer retention and streamlined hotel operations.



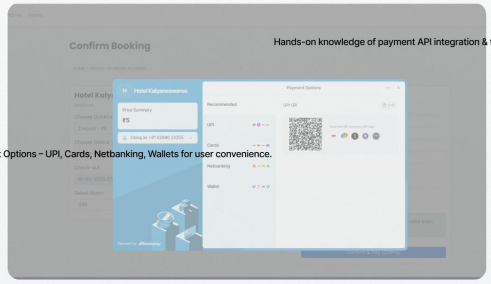
The Lodge Booking System provides a straightforward process allowing users to explore lodges, access detailed information including images and location, and make reservations directly.

A confirmation page guarantees clarity prior to the final submission, enhancing the overall user experience.



Implemented Razorpay Payment Gateway to facilitate secure online transactions through API.

Hands-on knowledge of payment API integration & transaction flow.

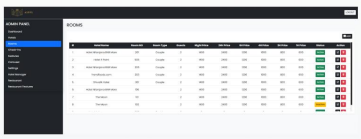


Multiple Payment Options – UPI, Cards, Netbanking, Wallets for user convenience.

Seamless Flow – Direct transition from booking confirmation to payment.

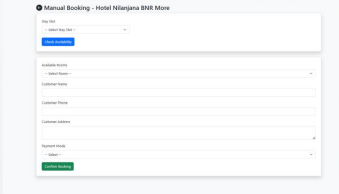
Design Perspective – Clean, distraction-free interface for a smooth payment experience.

Admin Panel



So, let me tell you about the Administrative Panel. It's like your all-in-one tool to keep an eye on everything happening at the hotel, so you can make smart decisions to boost performance.

Owner Panel



The Owner Panel empowers hotel managers with full control over their property, offering tools to manage rooms, bookings, and payments efficiently while maintaining a smooth operational workflow.

Business Impact Highlights

- Helped the client streamline hotel operations with digital booking and payment integration.
- Reduced manual errors in reservations, improving overall customer experience.
- Increased customer retention by 10% through a smoother and more reliable booking process.
- Enhanced transparency and trust with real-time booking status and secure payments.
- Improved efficiency for hotel owners, allowing them to manage rooms and pricing seamlessly.
- Contributed to overall business growth by enabling direct bookings, reducing dependency on third-party platforms.
